
New York State Newborn Screening Patient Registry

Learning From Your Experience for a Brighter Future

Because your child is participating in the New York State Newborn Screening Patient Registry:

- Health care providers can learn about the diseases on the newborn screening panel and the best treatment.
- Health care providers have access to information for a larger group of patients than they treat in their clinic.
- Improvements can be made to newborn screening in New York State!

Reminder

Your child will be enrolled until 18 years of age. When they turn 18 years old, we will ask their permission to continue in the registry until age 21.

You may request that we stop collecting information about your child at any time. Information will not be collected from the date your request is received.

You may also withdraw your child from the project. The information that has been collected will be removed from the registry and no more information will be collected.

Written requests should be mailed or faxed to:
